

# Yacht-Master One Step

- The industry's first stainless steel one step yacht boarding solution.
- Marine grade 316 Stainless side rail and support system.
- The only yacht boarding stair with a massive 19.5" wide and 11.25" deep tread design.
- User-friendly mounting kit. Constructed of 316 stainless. Designed to blend into your yacht's existing hardware when stairs are not in use.
- When not in use, the integrated standoff support system folds for easy storage and handling.

## Optional Equipment

- Single stanchion hand hold.
- Teak tread options available.
- Custom standoff options available to help clear hull glass or engine room air intakes.
- Custom hardware color options.

**Our Story.** Our passion to design the ultimate yacht boarding solutions drives us to continue creating innovative products for years to come. Our boarding stairs are designed for fast and easy set up, engineered for industry-leading performance, and crafted with timeless styling. Innovative features like our aircraft-inspired tread design offers a large and stable footing.

**About Us.** We are proud to be an American-made company and build every single Quickstep product right here in our shop located in Medford, New Jersey. Our team of employees does everything from answering phones and emails, processing orders, purchasing materials, cutting and bending the steel, fitting our one of kind treads, making final quality checks, to packing and shipping the products out.

**Quality.** Our team knows the importance of having marine products that perform year after year. That's why we put our products through rigorous testing to confirm long-lasting durability. Each product is individually tested to ensure strict quality guidelines are met before shipping.
